DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claims 1-7 are pending in the application.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph E. Waters on 08/23/2007.

The application has been amended as follows:

Claim 1. A tunable diffraction grating comprising:

a cell with a first cell wall spaced from a second cell wall;
electrodes disposed on facing surfaces of the first and second cell walls; and
an array of nematic liquid crystal convective rolls, wherein said convective rolls are arranged periodically in a space between said first cell wall and said second cell wall; and
a polymeric network stabilizing said array of nematic liquid crystal convective rolls,
wherein a grating constant of said tunable diffraction grating is determined by a structure of said convective rolls.

Claim 2, line 2. "a" has been corrected as --the--.

Claim 4. A method for producing a diffraction grating comprising the steps of:

Art Unit: 2871

introducing a polymerizable mixture including nematic liquid crystal, dopant, and polymerizable precursor between two electrically conductive substrates;

applying a potential difference across the polymerizable mixture to cause the nematic liquid crystal to assemble into an array of convective rolls; and

stabilizing the convective roll structure by forming a polymer network from the polymerizable precursor, wherein the polymer network is bounded by the convective roll structure and a grating constant of said diffraction grating is determined by the structure of said convective rolls.

Reasons for Allowance

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

None of the prior art of record discloses or suggests alone or in combination that a tunable diffraction grating and a method for producing the same comprising a combination of various elements/steps as claimed more specifically a polymeric network stabilizing the array of nematic liquid crystal convective rolls, wherein a grating constant of the tunable diffraction grating is determined by a structure of said convective rolls as set forth in claims 1 and 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
